BIO-DATA

BASIC INTRO:

PERSONAL DETAILS:

NAME:	Harsh Sharma	
UNIVERSITY:	IIT Kharagpur	
SCHOOLING:	Pre-Schooling:	MPS,Pratp Nagar
	High-Schooling:	MPS, Pratap Nagar
ADDRESS:	Jaipur	
HOBBIES:	▪ Playing Table Tennis ▪ Learning New Things ▪ Interacting with new people ▪ Listening songs	
DREAM:	Becoming a overall developed human	
FUTURE PLANS:	Short Term:	Learning Web Development Thorughly
	Long Term	Become a professional web developer

PROFESSIONAL INFORMATION:

COLLEGE	IIT Kharagpur
COURSE	Engineering
BRANCH	Computer Science Engineering
CORE LANGUAGE:	C++
Dream Comapany	GOOGLE
Duration Of Course	5 years(B.tech + M.tech)
Year Of Passing	2026

WHY IIT Kharagpur?

Indian Institute of Technology Kharagpur (IIT Kharagpur) is a public technical university established by the government of India in Kharagpur, West Bengal, India. Established in 1951, the institute is the first of the IITs to be established and is recognised as an Institute of National Importance. In 2019 it was awarded the status of Institute of Eminence by the government of India. The institute was initially established to train engineers after India attained independence in 1947. However, over the years, the institute's academic capabilities diversified with offerings in management, law, architecture, humanities, etc. IIT Kharagpur has an 8.7-square-kilometre (2,100-acre) campus and has about 22,000 residents.

IIT Kharagpur was the 1st IIT. I always wanted to be part of such an iit which had great market value and I also wanted to do engineering in computer science so i took IIT Kharagpur.

Expectations From COLLEGE

First Day Of College : Expectation Vs Reality. Ft. Viraj Ghela...

▶

😂 😂 😂 Expectation vs Reality in college life would always be matter of fun as reality is totally opposi

ONLINE CLASSES--A TRAGEDY

The facial expression of pain has recently attracted considerable interest in experimental and clinical research based on an increasing awareness that it supports the communication of pain as a second signal system besides the verbal one. Ordinarily, this facial movement is seen when a person is smiling and it is assumed to be associated with happiness or positive affect. Therefore, it is surprising that in the majority of the studies on facial responses during pain an increased frequency of oblique lip raise has been found compared to that of baseline conditions.

It has became a phase which needs to be spoken whenever someone praises onliine classes or emphasizes the benefit of online semester.

CRY FROM THE DEPTH OF HEARTS OF IITIANS
